SPANISH WALK

CONVENT GARDEN, KINSALE

BER A2/A3

A Stunning Location within the Heart of Kinsale

Spanish Walk at Convent Garden is set in a stunning location within the heart of Kinsale, only a couple of minutes of easy walking to the centre of this vibrant town.

Kinsale is a seafaring town, exuding its own distinctive charm, character and heritage, with a history dating back to medieval times. Today the Port of Kinsale, set in its own sheltered scenic harbour, continues to uphold its maritime tradition by operating as an international centre for Sailing, Fishing and Deep Sea Angling. Kinsale is also on the Wild Atlantic Way – the longest defined coastal touring route in the world. Over 2,500km in length, the route is renowned for some of the most breath-taking scenery.

Kinsale hosts many International Festivals and events throughout the calendar year – the Gourmet Food Festival organised by the Town's internationally acclaimed seafood restaurants, the Guinness International Jazz Festival, the International Bi-Annual Sovereigns Cup for Sailing and Point to Point Races.

Kinsale also plays host each year to the world renowned Kinsale Rugby Sevens International Competition. For the golf enthusiast, the world famous Old Head Golf Club and Kinsale Golf Club are both first class golf courses, designed to challenge the best.

Kinsale has something to offer everyone with three marinas, a yacht club, two outdoor activity centres, very active clubs promoting Gaelic Football, Hurling, Soccer, Rugby, Tennis, Golf, Equestrian and Water Sports (windsurfing, para-sailing and surfing at the nearby Blue Flag Beach of Garretstown). Kinsale is very well serviced with schools – Primary, Gaelscoil, Secondary and College of Further Education – all in close proximity to Convent Garden.

Renowned worldwide for its magnificent harbour which attracts many overseas sailors every year, Kinsale is also recognised as the gourmet capital of Ireland most recently achieving its first Michelin Star at Bastion restaurant in the town. The cosmopolitan and historic town is home to Kinsale Yacht Club with a magnificent marina in the heart of the town. Kinsale has one of the most beautiful and sheltered natural harbours in Ireland where many water sports are enjoyed.

Cork City itself, and Cork International Airport, are also very easily accessed just a short 20/25 minutes drive away.

Spanish Walk Contemporary Living

Welcome to the new townhouses at Spanish Walk in Convent Garden, Kinsale. These homes are completely different again in style to the previous releases in Rope Walk, Harvest Walk and Winter's Lane at Convent Garden. They are closest in style and finish to Winter's Lane but on a smaller scale.

It is exciting to see the developers, Cumnor Construction and architect's, JCA, vision for the entire unique scheme finally taking shape with this curve of townhouses built on a podium high above a 69 space car park which will serve the 31 apartments scheme currently under construction in the old convent building.

The homes are accessed via a granite-paved boulevard to the front which is beautifully landscaped to include two car spaces for each home. The homes themselves have all living quarters including a utility room/pantry and guest wc on the upper floor to make use of the views. Large balconies are available from each living room where you will find Nero T Matt kitchens from Casa Mia kitchen range with all Neff appliances and Franke sink and taps.

A beautiful entrance hallway leads to all three bedrooms at ground floor level which have Casa Mia smooth matt wardrobes with Premium Oyster Urban Oak interiors and open on to the deck and garden areas to the rear. The main bathrooms as well as one ensuite are also located on this level which are tiled with porcelain wall and floor tiles. Attention to detail and quality of fitout is paramount in these homes.

The oak stairs leads to the main living area which incorporates kitchen / dining and living. With a Stovax Studio 1 wood burning stove and fully glazed walls, these cosy spaces offer maximum light through triple glazed windows and great sea views from some of the units. Heating is by means of a Daikin split heat pump system and is underfloor at ground floor with low temperature aluminium radiators on first complemented by a heat recovery ventilations unit.

You will be impressed by the quality of finish, impeccable attention to detail, level of completion and most of all... the stunning views from the showhouse.
